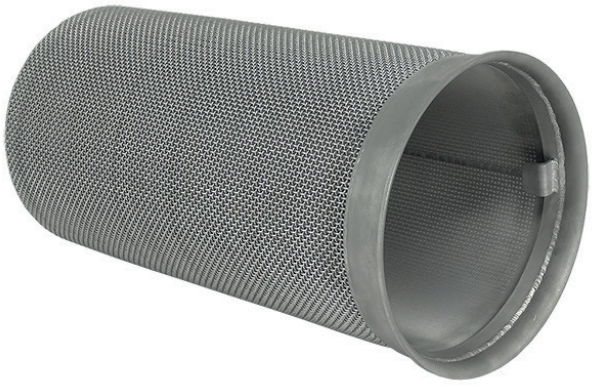
INLINE BASKET FILTER ELEMENT

www.nordicfiltration.com

Technical Data

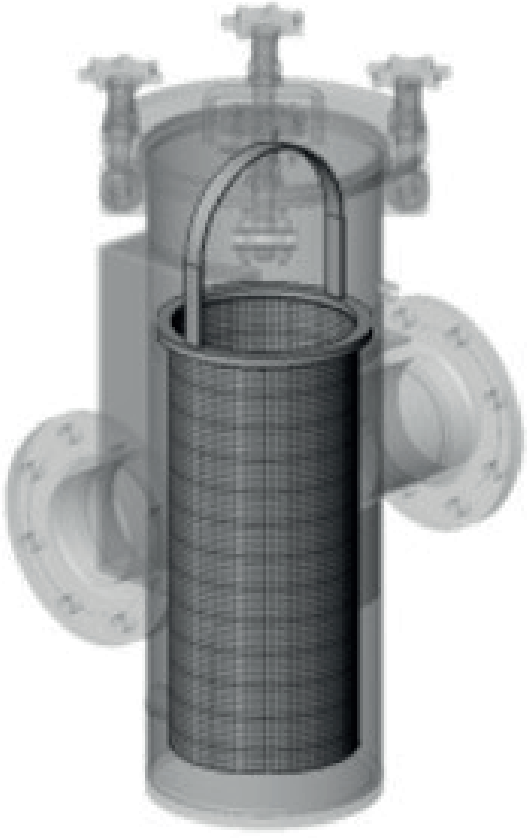
Material: AISI 316 (1.4401)
Temp. range: -10°/+80°C
Filtration grade: 50 - 5000µm
Mesh



The Basket Filter Element is intended for use in SF houses. These elements are made of stainless steel.

The basket is specially designed to store large amounts of dirt or particles and can be easily cleaned, enabling continuous use. By combining the features of a metal surface filter with the high capacity of a bag filter, this filter allows for a longer lifespan than most other high-flow filters on the market.

As a standard, this filter is available in various filtration levels from 50 µm to 5000 µm, and the basket filter is designed with a double-layer design to ensure high filtration efficiency.



At www.nordicfiltration.com you will find a wide selection of filtration products ready for you to order.

Nordic Filtration offers a wide selection of filtration products for water treatment. We have stock in Denmark from where we distribute all of our products to Scandinavia and the the rest of the world.

You can buy our products on local websites or by contacting us by phone or e-mail. Information about our products as well as brochures and manuals can be found on our website (www.nordicfiltration.com).

We can adapt all of our filtration products to your needs, and we offer visits from our consultants in order to find the right solution for you.
