FILTRATION SOLUTIONS

Process Filtration From Pure to Sterile

P-EG

MAIN FEATURES & BENEFITS:

- High quality stainless steel design
- Extremely low differential pressure
- Various connection types
- From 60 m³/h up to 19.200 m³/h

INDUSTRIES:

- Food & Beverage

- Engineering

- Chemical Industry

- Pharmaceutical Industry

- Automotive

Donaldson[®]
Ultrafilter

PRODUCT DESCRIPTION

P-EG filter housings have been developed for the purification of compressed air and other technical gases in industrial ranges of application. Due to the optimized construction they offer low differential pressure at high flow rates. Numerous different sizes of housings with various connections make it possible to adopt the filter system to exactly the needed requirements.

This product series contains 18 different sizes of housings for operating volume flows of 60 to 19.200 Nm³/h related to 7 bar(g). The Donaldson plug connection guarantees that the elements remain safely fixed always. Due to the modular design different element types can be installed into the housing, resulting in a highly flexible filtration system.

The P-EG housing is designed and developed for the following applications:

Filtration of air and gases

- Compressed Air
- Carbon Dioxide
- Technical Gases

Filtration of Steam

DIRECTIVES

All P-EG housings are designed in accordance with

- FDA CFR Code of Federal Regulations Title 21
- Pressure Equipment Directive 2014/68/EU
