

## Type 2-BFOS-DO Double Bag Filter Housing

The double filter housing series 2-BFOS-DO are welded stainless steel constructions to install two filter bag size 2 (2x 0,5 m<sup>2</sup>). Two standard bag filter housings of series BFOS are welded together. The cylindrical vessel is equipped with a casted hinged lid and a casted basket support. The top cover is to fold away, equipped with eyebolts and sealed with an O-ring. The filter bags are certainly fixed with a special downholder to provide an optimum sealing without any bypass. The design of the housing allows the use of Standard and High Efficiency bags and a wide variety of O-ring materials with no change in design. The stainless steel support basket ensures a pressure-proof support of the installed filter bag. Additional connections on both sides and a cast-bolting allow fast mounting of a diff. pressure gauge. The double filter housings are internally and externally electropolished and delivered with adjustable tripod stands.
