

Vana Sleeve

10"

Filter-Online
Nordic Filtration Solution

TECHNICAL DATA

- Length/Size: 10"
- Filter Method: Surface / Net filter
- Micron rating: 60, 100, 150, 200, 300
- Efficiency: 65%
- Max. pressure: 2,5bar Max. Diff. @ 25°C
- Max. temperature: +4...+40 °C

- Support Material: Polypropylene
- Gasket: Buna-N
- Netting: Nylon

Dimensions:

- Outer Diam.(OD): Sleeve 61mm
- Support 68mm
- Length : Sleeve 230mm
- Support 250mm

Sleeve net filter

filter sleeves provide a truly economical method of surface filtration. Available in standard 10", 60 to 350 micron are colour-coded for easy identification, are ideal for coarser applications and have the added benefit of being washable and re-used time and again.

Each sleeve, requires a support core that, as it suggests, gives the sleeve the strength it requires to withstand pressure differentials as the media removes debris.

Economical coarse filter

- Highly economical re-useable filter
